

Janadri Yalla Yashwanth

Software Engineer | Backend & Microservices | Java · Python · REST · Docker · CI/CD

yallayashwanth99@gmail.com | +91 8790819924 | [LinkedIn](#) | [GitHub](#) | Hyderabad, India 500001

SUMMARY

Software engineer building production backend microservices — REST APIs, async job orchestration, and containerized deployment on Linux via CI/CD. Strong in OOP design and problem-solving, proficient in Python with working knowledge of Java, and actively expanding into Spring Boot and Kubernetes. B.Tech in CS (AI & ML), CGPA 8.6; comfortable in small, fast-paced, self-organizing teams.

TECHNICAL SKILLS

Languages: Java, Python, SQL, C++, C

Backend & Microservices: REST APIs, microservices, FastAPI, OOP design, concurrency & async programming

Databases: PostgreSQL, Redis, SQL

Containers & DevOps: Docker, Docker Compose, CI/CD (GitHub Actions), Git, Linux / Unix

Testing & Process: Unit testing, SDLC, code review, debugging

Networking & Fundamentals: TCP/IP, HTTP, Computer Networks, Data Structures & Algorithms, Operating Systems

Expanding into: Spring Boot, Kubernetes, Kafka, Go (actively building proficiency)

Tools: Git & GitHub, Docker, Postman, IntelliJ IDEA, VS Code, Claude Code, Linux

EXPERIENCE

Software Engineer Trainee — Marut Drones

Feb 2026 – Present

- Built production microservices with FastAPI and REST APIs, backed by Celery/Redis async job orchestration (live progress, cancellation, RBAC), applying OOP design and clean-code practices.
- Containerized services with Docker and shipped them through CI/CD (GitHub Actions) to Linux workers; debugged concurrency and production issues across distributed workers.
- Modeled and queried data in PostgreSQL and Redis, and designed and consumed REST APIs with schema validation.
- Collaborated in a small, fast-paced team and maintained clear technical documentation.

Machine Learning Intern — Rooman Technologies

Jan 2025 – Mar 2025

- Built and evaluated a machine-learning model in Python, applying strong analytical and problem-solving skills.

SELECTED PROJECTS

Flight Log Analyzer — Full-Stack Diagnostics Backend

Python, FastAPI, REST, asyncio, Docker

- Built a FastAPI backend that ingests raw logs and returns generated reports, with a from-scratch binary parser (byte-level, 50+ message types) and a 50+ check diagnostic engine.
- Containerized the full stack with Docker / Docker Compose for reproducible deployment (~7,200 lines, solo-built).

Marut Survey Platform — Detection Microservices

FastAPI, Celery, Redis, PostgreSQL, Docker, S3

- Built async detection microservices with Celery/Redis job queues, owner-scoped RBAC, and PostgreSQL, streaming large datasets from S3.
- Shipped the stack via GitHub Actions CI/CD to systemd-managed workers on Linux.

EDUCATION

Sri Venkateswara College of Engineering, Tirupati

Dec 2021 – May 2025

B.Tech in Computer Science (Artificial Intelligence & Machine Learning) — CGPA: 8.6

Narayana Junior College, Hyderabad

Jun 2019 – Mar 2021

Intermediate (MPC) — 96%

CERTIFICATIONS

- CS50's Introduction to Programming with Python — Harvard University Online
- Databases: Topics in SQL — Stanford Online
