SUMMARY

Python software engineer and 2025 CSE graduate (CGPA 8.6) building production systems at Marut Drones — REST APIs, a full-stack web app, and ML-backed services. I write clean, maintainable Python, work in an agile team using Git and code review, and own features through testing, debugging, and deployment. Strong CS fundamentals; based in Hyderabad and available immediately.

TECHNICAL SKILLS

Languages: Python, SQL, JavaScript / TypeScript, Java, C

Python & Frameworks: FastAPI, async/await, Pydantic, SQLAlchemy, REST APIs, NumPy, OpenCV

Web / Full-Stack: React, HTML, CSS, Vite

Practices: Agile collaboration, SDLC, code review, testing & debugging, clean & maintainable code

Databases: PostgreSQL, Redis, SQL

CS Fundamentals: Data Structures & Algorithms, DBMS, Operating Systems, OOP

DevOps / Version Control: Git & GitHub, GitHub Actions CI/CD, Docker, Linux

Tools: Git & GitHub, Claude Code, VS Code, Postman, Docker, GitHub Actions, Linux

EXPERIENCE

Software Engineer Trainee — Marut Drones

Feb 2026 – Present

- Developed production Python services on the AI/automation team — three detection pipelines behind a FastAPI backend with async Celery/Redis job APIs — writing clean, modular code shared across detectors.
- Integrated SAM-2, DeepForest, and GroundingDINO/LangSAM, streaming large orthomosaics from S3 via GDAL/rasterio and deriving stockpile volumes (m3) and material classification.
- Debugged and stabilized production failures (CUDA/PyTorch mismatches, failed migrations, GPU/CPU worker setup), collaborating with the team on design and integration.
- Packaged the stack with Docker and shipped through GitHub Actions to systemd workers; used Git and code review for day-to-day version control.

Machine Learning Intern — Rooman Technologies

Jan 2025 – Mar 2025

- Developed and evaluated a sleep-disorder classification model in Python, reaching 98% accuracy, and delivered it through a web app for clinicians.

SELECTED PROJECTS

Flight Log Analyzer — Full-Stack Drone Diagnostics

Python, FastAPI, React, TypeScript, Docker

- Built a full-stack app (FastAPI + React) that ingests raw drone logs and generates PDF diagnostic reports, with a from-scratch Python binary parser decoding 50+ message types.
- Ran a 50+ check diagnostic engine and containerized the stack with Docker Compose for reproducible deployment (~7,200 lines, solo-built).

Aerial Image Object Detection — Multi-Model Benchmark

Python, PyTorch, SegFormer, OpenCV

- Benchmarked 4+ segmentation models on drone imagery and selected SegFormer-B5 for the cleanest detections, cutting false positives roughly 3x versus baselines.
- Built the OpenCV/NumPy pipeline — tiling, filtering, and per-class NMS — emitting annotated images and structured JSON.

EDUCATION

Sri Venkateswara College of Engineering, Tirupati

Dec 2021 – May 2025

B.Tech in Computer Science (Artificial Intelligence & Machine Learning) — CGPA: 8.6

Narayana Junior College, Hyderabad

Jun 2019 – Mar 2021

Intermediate (MPC) — 96%

CERTIFICATIONS

- [CS50's Introduction to Programming with Python — Harvard University Online](#)
- [Databases: Topics in SQL — Stanford Online](#)
